

K-LOVE radio station is a vital service to my local community because it offers hope, a prayer line, and helpful information. It actually saves lives. When people are suicidal they can call and receive help and prayer. It is vital for my bipolar condition. It is positive God-centered music and information that keeps my spirits up. It helps during times of depression like no other broadcast can. If it was replaced by a LPFM we would not have the benefit of Christian based radio with people to pray with and be encouraged by. Our nation was founded on Christianity and we need to keep the Christian stations on the air. It is very vital to the public because it encourages, promotes music for families that is positive, promotes helping your local community through a variety of services and reaches people who may not come to church but need deliverance from drugs/alcohol etc. and they can find a relationship with Jesus that causes them to be a better citizen.
